

1) Adjust the bungee to the torch

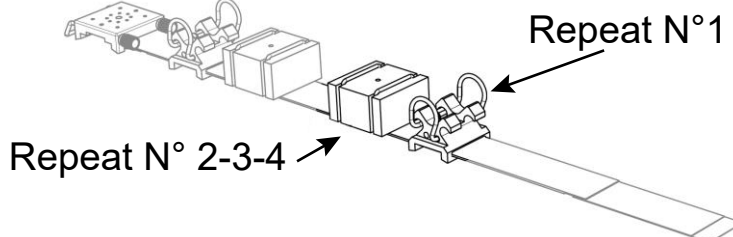

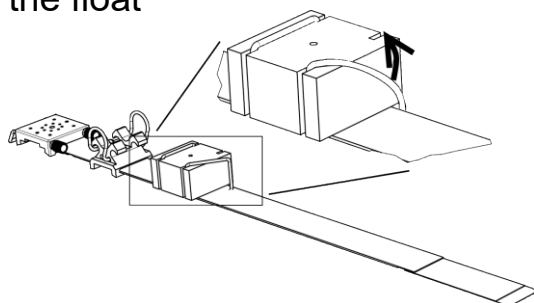

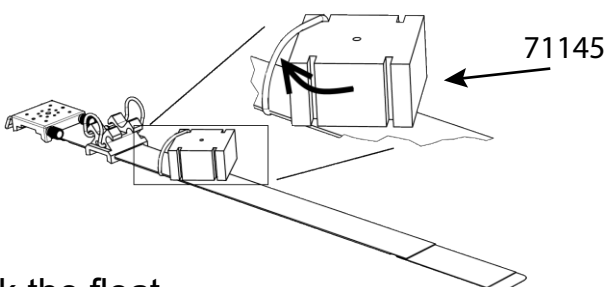

2) Insert torch holder

3) Insert the rings

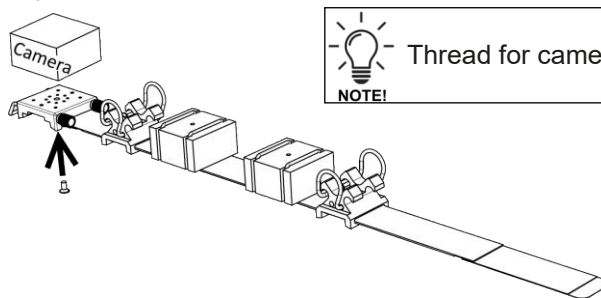

4) Hook the float

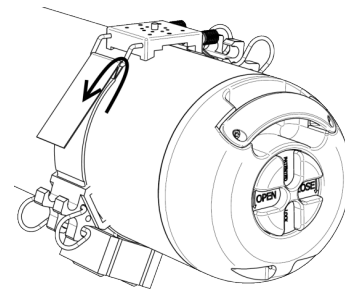

5) Second torch holder and float

6) Fix the camera

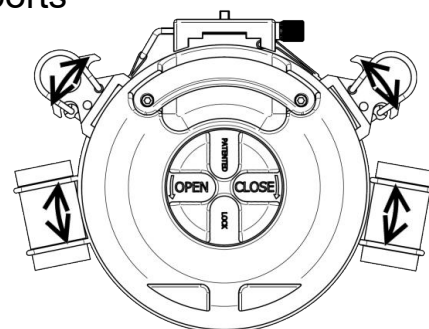

Thread for camera Ø1/4-20"

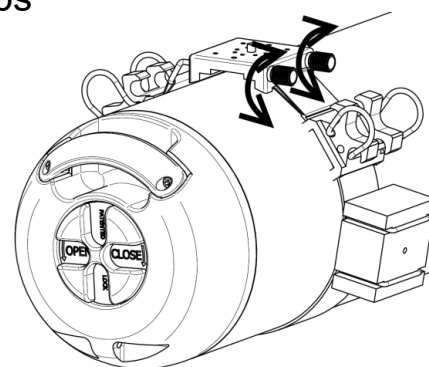

7) Place the support on the scooter

8) Adjust the supports and floats

10) Tighten the support using the knobs

Bouyancy varies depending on the choice of camera and lights attached: without any camera or lights the support is positively bouyant in fresh water.

Each float unit (2 are included) is about +150g. Additional floats can be bought (71145).
